ROUND VENT BASES

FAMCO

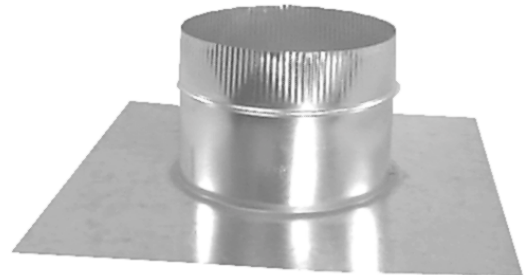

OPTIONS:

Available in other materials. (i.e., Copper, Aluminum, etc.)

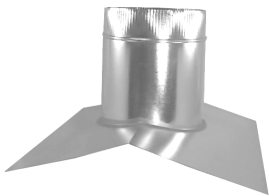

Chain Damper available.

Curb mount (customer provides dimensions).

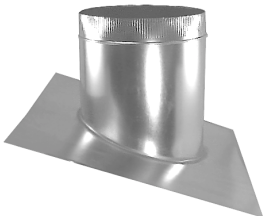

Tapered base (customer provides dimensions).

FLAT BASE - used for flat roofs. No pitch or slope measurements are needed.

SADDLE BASE - used on ridge (peak) of roof. Need slope of roof on both sides. This measurement should be given in standard roof slope measurement (i.e., 4/12, 5/12, etc.).

PITCHED BASE - used on roofs with any slope and placed below the ridge line. Must provide slope measurement on side of roof where it is to be placed using standard roof measurements (as with saddle).
